Summary

Detail-oriented BSc. Computer Science student with expertise in mobile app development and public data analysis. Experienced in creating innovative solutions like the Digital Transit Companion project, improving bus pass management systems. Proficient in CSS, HTML, C, and Core Java. Skilled in optimizing system performance and enhancing user experiences. Strong communication skills for effective collaboration. Eager to contribute to impactful projects in computer science.

Skills

- Sales
- HTML (Level 5)
- CSS
- English Language Communication
- Business Executive
- Core Java
- C Language
- Social Media Marketing
- Database Management System
- Agile Project Management
- Administrative Analysis

Experience

University Level project in Second Year of Degree (2023)

**May 2023 - Jun 2024
(1 Years,1 Months)**

Web Application Developer/Data Administrator

- Developed a comprehensive digital solution for managing bus passes, aimed at providing convenience and efficiency for both customers and transportation authorities. Implemented features include user registration, digital pass generation, renewal reminders, and real-time pass verification.
- Utilized mobile technology to enable passengers to access their bus passes conveniently on their smartphones, reducing the need for physical passes and paper-based processes. Integrated secure authentication and encryption protocols to ensure data privacy and security.

Education

Sangamner College

Jun 2022

Bsc. Computer Science (Final Year)
8.0

Projects

BUSS-PASS MANAGEMENT SYSTEM

- I led the development of the transformative project redefining bus pass management systems. This innovative solution integrates user-friendly mobile interfaces with a robust back-end infrastructure developed using HTML, CSS and MySQL. Noteworthy features include secure pass generation, renewal reminders, and real-time verification, all aimed at enhancing commuter experiences. Leveraging public data analysis techniques, we gleaned insights into commuter patterns and transit efficiency, informing dynamic adjustments to pass offerings and routes.

- Data Analytics
- Embedded C Programming

🗣️ Languages

- Marathi(Mother Tongue)
- English(Proficient)
- Hindi(Fluent)
- Gujarat(Basic)

🏆 Award

Web Development Achievement
Award(University)

National Science Olympiad
(Bronze Medalist)

🎨 Interest

- Sketching
- Solo Travelling

- Result - Passengers can easily access their passes anytime, anywhere, leading to quicker boarding times and smoother transit experiences.

📄 Additional Information

Youtuber with 15,000+ subscribers and creating content focused on Marathi & Maharashtra Culture. Proficient in video editing, content creation and audience engagement strategies.
